
PathWise Launches Enhanced Corrective and Preventive Action Training Program

11/24/2008 – Salt Lake City, Utah – PathWise is pleased to announce the offering of a new and improved CAPA training program for quality and compliance personnel. In addition to offering up-to-date regulatory requirement procedures and process improvements, PathWise has refined the overall CAPA process to reflect an easy to navigate, closed-loop quality management system. The new system contains three integrated training modules, each of which are housed within a circular sequence of procedures. Each process within the step-by-step system contains a definitive opening point and closure. Among other helpful additions is an “Investigational Toolkit,” providing quality managers with the necessary resources and guidelines to perform successful quality system investigations.

Further enhancing the functionality and usage of the program is a complete redesign of the system packaging. The program now features stand-alone training modules housed in easy-to-reference, color coded booklets. A sturdy carrying case accompanies the modules for easy filing and travel between work locations.

The new CAPA program will be available for purchase and implementation on December 1. For more information or to receive a quote for your organization, please contact us at **866.580.PATH**.
